// CATALOGUE VOL 1.0 /
 ENGLISH / SWE + FIN

TIP KICK / The two elliptical compressed areas gather the power to the flex zone and give a faster kick and maximum power to the shot.

TIP SHAPE / 1,5 degree Tipshape close to the blade for best kick. Blade will be in better position and it will reduce the need for hook.

POWERRAILS / Revolutionary 2 Axle Multi-power Hybrid shaft for best shooting power and accuracy. The two compressed PowerRails transfer the power faster than any shaft to the flex zone.

DOUBLE-POWERRAILS / Power rails in the middle of shaft and below upper hand. Double Effect.

STICK BALANCE SYSTEM / Set the balance by adding or removing the weight in the endcap. You can move the balance point up to 45mm. Available in 20g weight.

CURVESHAF / Medium curve shape fit for all players. Double Power Rails gives more power.

TRIADSHAFT / Special "triad" profile of the shaft. Extra durable for extra performance.

SUPERLIGHT SHAFT / Light shaft construction with stiffness in the right places, 12% shaft weight reduction. Perfect balance and snappy shots.

D-OVAL / The upper side of oval is flat about 5mm, in which case it have better feel to the hand.

DOUBLEWRAP / Totally changeable upper and lower grip.

WRAP-1-PIECE / Changeable upper grip. Sticky and durable 1piece grip in lower hand.

BLOCK / Blade for biggest shots. Precurved - easy to play. Very light. 3 degrees open face. 8,5mm concavity. Stiff, pre-angled heel.

UPLIFT / Very light, 1,5 degrees open face, pretty straight - make your own curve. Concavity 7mm. Maximum size. Raised horizontal ball lines = smooth ball moves from heel to nose.

DELTA / XL blade size, 4,5 degree open face angle, big and powerful blade. 8,5mm concavity.

AVOX / New blade with 9,5mm big concavity and aggressive open face angle for better shots. Stiff heel, upper frame and special ribs in nose for easy and simple "pocket" modification.

CARBON POLYMER BLADE / Carbon piece gives perfect stiffness, hardest shots and ultimate look!

- PRE-PREG

- TRX RESIN
- EVO RESIN

Ultra Light / New extreme superlight materials made by blow moulding & vacuum pre-preg manufacturing.

Blow Moulded / Technical shafts in High Performance Handmade Carbon material

Pre-Preg / Pre-woven fabric shaft in Carbon and Composite material

TRX-resin, EVO-resin / Two different resins for best quality!

MATERIALS / From high-end Carbon T2200 to Composite R500. We also use two different resin, EVO-resin and TRX-resin.

- ULTRA FAST
- SUPER FAST
- MEDIUM FAST

SHAFTKICK / We have created a unique marking system that tells the shaftkick speed. More speed, more power to the shots. UltraFast, SuperFast and MediumFast.
